

# City of Boston

Indicative Valuation  
of Publicly-Owned Real Estate

# Introduction

## Professional Management of Public Wealth

The first step in the process towards a more professional management of public wealth is transparency.

This presentation contains a value estimate of the real property portfolio in the City of Boston in 2017.

It is made from a consolidated list of publicly-held real estate alone and estimate a defensible value of that portfolio.

Compiled by applying asset tracing techniques to surface a vast majority of real property that is held directly or indirectly by various governments entities (including affiliated corporate entities and authorities) situated across all jurisdictional strata in City of Boston.

# Valuation Methodology

## List of Assets

### **Asset tracing techniques**

Listing all real property held directly or indirectly by various governments entities, across all jurisdictional strata

Electronic data geo-spatial analysis digitized inventory of government-owned property
